

Check out these three, of the nearly 200, recognitions featured on osa.org/womeninoptics. Make a donation and add your story today!

Manijeh Razeghi

Northwestern Univ., USA

I am extremely grateful to Prof. Razeghi as my Ph.D advisor. She led me to the exciting realm of quantum cascade lasers. Her vision and experience are the north star that always points me in the right direction.

Submitted by Yanbo Bai,
Coherent Inc., USA

Prof. Kaoru Minoshima

The Univ. of Electro-
Communications, Japan

I have the highest respect for Prof. Kaoru Minoshima, who is not only an outstanding researcher with seemingly limitless energy, but also a dear friend of some 15 years.

Submitted by Thomas Schibli,
Univ. of Colorado, Boulder, USA

Monika Ritsch-Marte

Innsbruck Medical Univ., Austria

There are people who write papers and then there are the people who write the papers that I wish I had written. Monika's papers are special... she and her team write beautiful papers each containing the fresh idea of a creative mind.

Submitted by Miles Padgett,
Univ. of Glasgow, UK

AMAZING WOMEN DRIVE INNOVATION IN OPTICS AND PHOTONICS

Which one impacted your career?

The OSA Foundation encourages you to publicly honor those individuals who have made an impact in your career and life. We've created an online gallery to collect tributes, and invite you to add your voice.

Honor Your Mentor Today.
