Dear Dr. Manijeh Razegh:

Congratulations! The Optical Society (OSA) is pleased to inform you that your paper, **High power continuous wave operation of single mode quantum cascade lasers up to 5 W spanning $\lambda \sim 3.8\text{-}8.3 \mu\text{m}$** , has been chosen for inclusion in *Spotlight on Optics*.

Spotlight on Optics (Spotlight) showcases research produced in our journals—research and information that would be impossible without your talent and contribution. Your paper is in excellent company. Only two papers are highlighted from our respective journals each month from among the scores of fine articles published. Our journals are foremost in the field, with consistently high Institute for Scientific Information (ISI) rankings among the top 20.

We invite you to visit the page (<http://www.osapublishing.org/spotlight/>) and see this column and your contribution to it—making comments on your paper or on another Spotlight article that may interest you. A large part of Spotlight's purpose is to encourage comments among authors and readers. Feel free to enhance the reader experience by providing not only comments about your paper but also a link to pertinent supplemental material.

Again, congratulations on being in the "Spotlight!" We are proud to highlight work that has made our journals a sought-after commodity. We thank you for your continued interest in and support of our publications.

Sincerely,

A handwritten signature in black ink that reads "Elizabeth Nolan". The signature is written in a cursive, flowing style.

Elizabeth Nolan
Deputy Executive Director and Chief Publishing Officer
